Hardware Virtualization via USB-C

Whether you prefer in-person, remote, or a combination of both, Clevershare empowers you to conduct meetings according to your preference. A staggering 62% of Enterprise users utilize over 3 Unified Communication platforms. With Clevershare, you gain the ability to effortlessly initiate a meeting on any of these UC platforms while seamlessly connecting to the display, audio, and visual equipment in the room. This ensures a smooth and hassle-free experience when entering the meeting room, regardless of your chosen UC platform.
