

MimioConnect Blended Learning Platform

MimioConnect empowers learning and helps educators effectively drive participation and collaboration in all settings. Teachers can deliver interactive lessons with any size group - whole class, small group, and one-on-one. Students can view and interact with content wherever they're learning from, allowing remote students to collaborate with their classmates and access instructional materials.

For Every Learning Environment

One solution for classroom, remote, and hybrid teaching.

Real-Time Formative Assessments

Review feedback immediately to adjust instruction to meet students needs.

Synchronous & Asynchronous Learning

Work together as a group and give students assignments to complete independently.

Benefits

- **Increase Participation**
Give every student a voice by letting everyone share work with the class, respond to questions, and ask for help privately.
- **Keep Students On Track**
Monitor student work in real time and see when students are off-track. Additionally, lock all screens to bring the focus back to the front of the room.
- **Tailor Instruction**
Use assessment data and immediate feedback to tailor instruction for the different learning levels in your class.
- **Instantly Grade Activities**
All activities can be graded and scores can be exported or posted in other systems.

Boost class engagement and confidence with features for all learners.

Create Interactive Lessons

Build dynamic lessons using PhET math and science simulations, audio files, videos, document cameras, web pages, and more. Add hands-on activities like drag-and-drop, labeling, and sorting to help students practice key skills.

View Student Work in Real Time

Monitor, grade, and provide feedback to students as they complete activities. Spark discussions by displaying student screens at the front of the class.

Collaboration with Ease

Connect mobile devices from any location, including remote and in class, simultaneously. Set permissions to allow students to share their screen and annotations with the group.

Instant Feedback for Students

Working independently or as a group, students can instantly see if they answered a question correctly, helping them to identify areas of focus and maximize their learning potential.

Smooth Transition

Use with Current Technology

Deliver lessons using interactive displays, whiteboards, projectors, Chromebooks, iPads or other student devices.

Integration

MimioConnect fully integrates with the most widely used Learning Management Systems (LMS) including Google Classroom, Microsoft, Schoology, Canvas, Moodle, BrightSpace, and Blackboard. Depending on license, you can sync class rosters, sync data, and embed within your school's LMS. See back for details.

Import Lessons

Open Native SMART Notebook & Promethean FlipChart Files

Rich Lesson Library

10,000+ Premade Lessons Reference CCSS and TEKS.

Audio & Video Streaming

Ensures everyone can be seen and heard regardless of location.

Annotations

Use whiteboard tools to illustrate key concepts.

Single Sign On

Sign in with a Google Classroom or Microsoft account.

Cloud Solution

Quick setup and easy to maintain.

Success Manager

Works with your team to ensure a smooth and easy integration.

Custom Training

Add personalized training to help meet your goals.

Lesson Creation	- Create lessons from materials stored in Google Drive or OneDrive - Set background images and color - Share lessons via email - Easy-to-use toolbar with powerful interactive tools - Import SMART Notebook, Promethean ActivInspire, PowerPoint, and common format .IWB files with minimal reformatting	Multimedia	- Embed audio, video, web pages, YouTube, and BBC videos - Import audio, video, PDFs, Google Slides, Docs, and Sheets - Record audio and video - Use document cameras - Video playback controls (play/pause/rewind) of embedded files.
Rich Lesson Library	- Access 1000s of K-12 math, reading & science lessons - Modify content as needed - Use critical learning objectives as a foundation for learning	Assessments	- Label Diagram - Identification & Matching - Multiple Choice & Multiple Mark - Yes/No & True/False - Sequencing & Drag and Drop - Numeric - Drawing
Collaboration Tools	- Connect from anywhere* - Set permissions to allow students to share annotations with group - Cloud collaboration - IOS/Windows/Chrome	Classroom Management Tools	- Lock students' screens - Pick a student at random and display student's name at the front of the class and across all devices - Teacher can control the presentation from anywhere in the classroom
Whiteboard & Presentation Tools	- Color Settings - Pen & Highlighter Tools - Shapes & Lines - Animations & Transitions - Spotlight, Reveal, and Laser Pointer	Technical Specifications	- Works on tablets, laptops and mobile phones - Works in Chrome, Safari, and Edge
Self-Paced* Learning	- In and outside of the classroom - Instant scoring - Right/wrong feedback - Review lessons presented in class	Live Video & Audio Streaming*	- Display/hide presenter and participants on screen - Mute and Unmute All
Integrations*	- Single Sign-On with Google, Microsoft, Schoology, Canvas, Moodle, BrightSpace, and Blackboard - Import/sync class rosters - Post lessons and grades directly to LMS programs - LTI Integrations (except Google)	Engagement Tools	- Instant polling - Students receive immediate feedback - Students can message teachers privately to request help - Variety of question types - Random 'Pick' feature
		Grading and Reporting*	- Instant grading on group & self-paced activities - Monitor student progress in real time - Share reports via email - Student & Class Performance Reports - Export data for use in other programs

Licensing Options

Classroom: Whiteboard and presentation tools, Single Sign-On (SSO) for teachers, lesson delivery to anonymous sessions, 300MB storage, Lesson Library, import lessons, and classroom management tools.

Plus: All of the above plus, import and present lessons using class rosters, SSO for teachers and students, 500MB storage, self-paced and group instruction, instant grading, and reporting.

Pro: All of the above plus, 3GB storage and video conferencing.

Enterprise: All of the above plus 5GB storage, full LMS data and roster integration, dedicated success manager, and option for customized Professional Development services.

*May require additional license. See Licensing Options and visit mimioconnect.com/pricing for details.
