**These printers have customized instructions for connecting them to our website. Look for their specific how-to videos or documents.*

If you are experiencing connectivity or print issues with your non-Robo printers, please coordinate both with our customer support at customer@boxlight.com and the support personnel at 3DPrinterOS at help@3dprinteros.com as we are partnered together to enable your printer to utilize MyStemKits!

Experimental Printers:

Experimental printers will most likely work in our website. However, we have not yet verified a user with that specific model, so some of our pre-set print settings may need adjusting for the below printers or the connectivity may not work as we envision. Please verify that your printer works prior to purchasing a subscription. You can sign up for a free trial to verify connectivity of your particular printer.
