

Release Notes: Firmware Update August 2022

ProColor 3 Interactive Displays

Home Screen Changes:

- Default Home Screen apps are now Note, Settings, Input, and Opera Browser.

Updated Unplug'd Server:

- Unplug'd now supports Webcast, Chromecast, and Miracast.

Opera as Default Browser:

- Chrome and the native Android browser are removed.
 - If you wish to add Chrome back on you display, [follow these instructions](#).
- Users can install any browser of their choice from MimioMarket (now called CleverStore) or by sideloading an .apk file with [NDMS \(Networked Device Management System\)](#).

Auto Logout Improvements:

- User profiles will be logged out when the panel is shut down, if turned on in Settings>Startup and Shutdown>Browser option.
- Note that Browser cookies and history will be cleared and reset to default.

Updated Version of Note:

- Insert resizable tables, mind maps, sticky notes, and more.
- Generate QR codes to share Notes more easily.

Improved Annotation Tool:

- Choose from more colors and line options.
- Send annotations directly to cloud drive without first saving to internal storage.

MimioMessage has been replaced by ClevertouchLive

MimioMarket has been replaced by CleverStore

New CleverShare App for Screensharing
