About MimioStudio

MimioStudio™ classroom software is the unifying software solution for MimioClassroom™ products and other interactive displays, providing more options for learning than ever before. MimioStudio classrooms can learn interactively using the MimioPad™ wireless pen tablet, MimioVote™ assessment tool, and mobile devices equipped with the MimioMobile™ application. With a MimioStudio software or hardware license, the teacher can connect up to three mobile devices using the MimioMobile app for free.

The 12.0 release provides full support for 4K displays. This release also adds support for more Boxlight interactive hardware devices: the MimioFrame touch board kit, MimioSpace collaborative system, and the latest Boxlight ProColor interactive flat panel displays. Additionally, the release provides improvements to the import functionality of PDFs as well as PowerPoint, SMART Notebook, and Promethean files.

The 12.43 release adds support to Mac OS 13. It also contains other bug fixes and improvements.

The 12.43.1 release adds support to Mac OS 14 (English only)

Operating System Support

Microsoft Windows   **Macintosh**

- Windows 7   Mac 11

- Windows 8   Mac 12

- Windows 10   Mac 13
- Windows 11
                                                              Mac 14.x *

* Version 14.x includes all macOS Sonoma releases v14.0 – 14.2

Supported Languages

MimioStudio software supports the following languages:

Improvements for 12.0

- Support for latest Boxlight ProColor interactive flat panel displays
- Improvements to import SMART Notebook, Promethean, and PowerPoint files as well as PDF documents
- Improved installer, reducing installation time considerably

Known Issues

Auto-calibration is displayed during software installation	Please install the MimioStudio software before connecting the USB cable from the 280 projector.
MimioProjector™ 280 may be identified as a mouse pad initially on a Mac	Occasionally, you will receive a mouse pad detected message after plugging in the USB cable from the 280 projector. It will disappear as soon as auto-calibration completes.
Import of PDF file into Notebook displays strange characters	The Enable Protected Mode at Startup option may need to be disabled.

1. Launch Adobe Reader and select **Edit > Preferences**.

2. Select **General** for Adobe Reader X or **Security (Enhanced)** for Adobe Reader XI from the left navigation pane.

3. Under application startup, uncheck the **Enable Protected Mode at Startup** checkbox.

Antivirus software may affect MimioStudio installation	MimioStudio software installation may not be successful when antivirus software is running. We recommend turning off antivirus software before installing MimioStudio software.

No support for original MimioPad and XI with Studio 12.0

Original MimioPad and Mimio XI are no longer officially supported by MimioStudio.

Limited support for automatic audio/video playback

MimioStudio 12 software no longer supports the automatic playback of any multimedia file. MimioStudio 8 software and above will use the CODECS from multimedia programs that are already installed on the user's computer. For example, for Windows users with Windows Media Player, MimioStudio 11.0/11.1 software will automatically play a WMV file inside Notebook. Similarly, MimioStudio 11.0/11.1 software will automatically play MOV files for Mac users with the default QuickTime program installed. Linux does not have a default media player for MimioStudio software to leverage. Users will be alerted by a pop-up dialog box when playback is not possible.

No auto-updates

MimioStudio v12.0 is a full download and there will be no auto-updates provided for previous versions.

No support for TextTools

MimioStudio software has removed support for TextTools. There will be no Writing Pad and Keyboard available, however users can use the OS inbuilt keyboard.
