MimioTeach Installation Guide
1

Unpack MimioTeach and make sure all parts are included:

- MimioTeach bar
- USB power adaptor
- MimioHub
- USB cable
- Mounting plates
- MimioTeach stylus

2

MimioStudio

boxlight.com/software

Download and install MimioStudio from the Boxlight website.

MimioStudio is available for Windows, Mac, and Linux.
3

Connect the USB cable to the power adaptor.

If your MimioTeach came with international plugs, attach the correct one for your region.
4

Plug in the power adaptor and connect the USB cable to the MimioTeach.

Alternatively, the MimioTeach can also run on 3 AAA batteries.

5

Unscrew the end of the MimioTeach stylus and remove the protective plastic strip to begin charging the batteries.

For more info, visit the MimioTeach Support Page.
MimioTeach Installation Guide

6

Place the MimioTeach bar on your whiteboard, using the metal mounting plates to attach it if necessary.

Position the MimioTeach on the upper left, 3 inches from the edge of your projector image.
7

Rest the stylus in the cradle on the left of the MimioTeach bar. The stylus will begin to charge, and the ring will glow green when the stylus is ready.
8

Insert the MimioHub into your laptop's USB port and launch MimioStudio.

MimioStudio must be running to connect with the MimioTeach.

9

Turn on the MimioTeach by pressing the Launch button (▦). The status light will glow either green or amber:

- 🟢 Connected successfully
- 🟠 Cannot find a MimioHub

10

Calibrate the MimioTeach by pressing the calibration button (⊕).

Press the stylus onto each target until complete. Your MimioTeach is now ready to use!

For more info, visit the MimioTeach Support Page.
